We thank you for your time spent taking this survey.
Your response has been recorded.

Below is a summary of your responses

Download PDF

Beginning of Survey

Welcome to the 2020-2021 North Dakota School Immunization Survey. North Dakota Administrative Code (33-06-05) requires schools to complete the annual School Immunization Survey. The survey must be submitted online no later than November 9, 2020.

Please choose the school you are completing the survey for and complete the required immunization information. If completing the survey for multiple schools, submit a separate survey for each school.

All fields require an answer, so make sure to complete each field.

***School requirements have changed for the 2020-2021 school year.

Please be sure to read through the school immunization requirements below or on the NDDoH Immunization Program Website:

https://www.health.nd.gov/immunize/schools-and-childcare.

Additional instructions and resources for completing the survey are also available on the website.

**The North Dakota Immunization Information System (NDIIS) is available to help schools determine the immunization status of their students. For more information on how to obtain access to NDIIS, please go to the immunization program website at https://www.health.nd.gov/immunize/ndiis.

If you run into any issues with the school survey, please contact the North Dakota Department of Health Immunization Program at 701.328.3386 or toll-free at 800.472.2180.

Thank you for completing the survey!

2020-2021 School Immunization Requirements

	Number of Required Doses			
Vaccine Type	Kindergarten-6	Grades 7-10	Grade 11-12	
DTaP/DTP/DT/Tdap/Td*	5	5	5	
Hepatitis B	3	3	3	
IPV/OPV**	4	4	4	
MMR	2	2	2	
Varicella (Chickenpox)	2	2	2	
Meningococcal ¹	0	1	2	
Tdap [⊕]	0	1	1	

- * One dose of DTaP (pediatric diphtheria, tetanus, and acellular pertussis) vaccine must have been given on or after the fourth birthday. Only four doses are necessary if the fourth dose was administered on or after the fourth birthday. Three doses of Tdap (adolescent/adult tetanus, diphtheria, and acellular pertussis)/Td are required for children ages seven or older who were not previously vaccinated. Tdap should be used as the first dose followed by two doses of Td for children age seven or older not previously vaccinated.
- For polio vaccination, in an all-IPV or all-OPV schedule: one dose must have been given on or after the fourth birthday. The final dose in the series should be administered on or after the fourth birthday and at least six months after the previous dose. If four doses are administered prior to age four, a fifth dose should be administered on or after age four. Only three doses of IPV are required if the third dose is given on or after the fourth birthday. Children born before August 2005 only need four doses separated by at least four weeks. These children do not need a dose after the age of four.
- * Any doses of OPV administered after April 1, 2016, should not be counted as valid, because it was bivalent or monovalent vaccine, rather than trivalent. The child should be revaccinated with IPV vaccine, accordingly.
- 1 One dose of meningococcal conjugate vaccine (MCV4) must have been given on or after the tenth birthday. The second dose of MCV4 must be given on or after the sixteenth birthday. If the first dose of MCV4 is given after the sixteenth birthday, then only one dose of MCV4 is required for eleventh and twelfth grade.
- One dose of Tdap must have been given on or after the eleventh birthday.

Exemptions

Students may be exempt from immunization requirements for the following reasons:

- Medical Exemption: Requires a certificate signed by a licensed physician stating that the physical condition of the child is such that immunization would endanger the life or health of the child.
- Personal Belief or Religious Belief Exemption: Requires a certificate signed by the parent or guardian whose sincerely held philosophical, moral or religious belief is opposed to such immunization.
- History of Disease Exemption: Requires a certificate signed by a physician stating that the child has a reliable
 history of disease. History of disease exemptions may only be claimed for hepatitis B, varicella, measles, mumps, or
 rubella.

Exclusion

All children must be up-to-date according to the school immunization requirements or have claimed an exemption by October 1st of each school year or they must be excluded from school. Children enrolling in school after October 1st have 30 days to be up-to-date or claim an exemption or they must be excluded from school.

Updated: 01/02/2020

Select your school from the 2020-2021 list:

If completing the survey for multiple schools, submit a separate survey for each school.

Please select 'Other' if your school is not available or if your school's name has changed.

If you are completing the survey for only homeschooled students in a school district, please select 'Other' and complete the information in the following questions, including "homeschooled students" and the district name in the school name field.

	•
Is your school public or non-public?	
Public	
Non-Public	

Please enter the following contact information for person completing survey:
